

## LED LAMP VOLTAGE CONVERTOR

Led lamp voltage input/out parameter:

1.  $V_{in}=13-24V$ ,  $V_{out}=12V$   $I_{out}<3.5A$

If  $I_{out}=3.5-4.5A$ , need add radiator

2.  $V_{in}=24-30V$ ,  $V_{out}=12V$   $I_{out}<2A$

3.  $V_{in}=30-36V$ ,  $V_{out}=12V$   $I_{out}<1A$
